The Common Ground of Nebraska (CGN) will be offering a Free Locator Training Workshop in Lincoln, Nebraska. This 1 day workshop is scheduled for Thursday, July 31, 2008 and will focus upon underground locating fundamentals and theory followed with hands on field locating.

The CGN is a collaborative partnership of stakeholders representing all industries involved in underground utility damage prevention and public safety. It is the commitment of the CGN to ensure the integrity of the underground infrastructure through education and fostering the spirit of shared responsibility among all parties involved in the damage prevention process. Acting upon that commitment, the CGN recognizes the need for consistent and cost effective training opportunities for those that perform the functions of underground locating within their organizations.

Consolidated Utility Services, Inc. has actively contributed to the CGN since initiating and hosting the inaugural meeting of the CGN organization in October of 2006. Since the inaugural meeting the organization has grown to an active membership of 45 individuals representing Stakeholder groups across the State of Nebraska.

For further information regarding the CGN or the upcoming Locator Workshop, please contact Susan Griess, Director, Digger's Hotline of Nebraska/Consolidated Utility Services, Inc. at [susan.griess@cusinc.com](mailto:susan.griess@cusinc.com) or 402-334-3424.

To register for the FREE workshop please complete and return the attached registration form.
